

RECORDING PAPER

SORIMEX is one of the leading distributors of recording paper, that is used to record result of medical procedures. We offer paper for the majority of types of ECG, EEG, CTG and ultrasound devices on the market, as well as laboratory printers. We offer original paper for sale (Mitsubishi, Sony), or compatible substitutes for the devices of the leading manufacturers.

Clinical areas in which the use of recording paper is essential:

- medical diagnostics in:
 - cardiology
 - electroencephalography
 - monitoring of the cardiac functions of the fetus
 - ultrasonography
 - spirometry
- laboratory analysis

Our recording papers are characterised by:

- excellent quality of the structure
- clear and readable overprint
- proper writing weight
- proper basis weight, that prevent the dusting of the paper
- different types of perforations and inscriptions
- clear, readable inscription, that is smear-proof

The great quality of our recording paper protects the printers from premature breaking down. The clear record ensures the work comfort for the personnel reading the examination result. Each and every paper roll or fanfold is used in 100%.
